

DESIGN BY NIELS JØRGEN HAUGESEN

HAY

X-LINE CHAIR

HIGHLIGHTS

- Iconic steel chair from the 1970s with a simple and logical design language
- The distinctive X-structure in the middle of the chair adds flexibility and strength
- Its refined construction made it a masterpiece of its time and keeps it equally relevant today
- Available in different finishes and colours
- Stackable design that enables the chair to be stacked extremely closely
- Stackable up to 10 pcs.
- Suitable for both outdoor and indoor use, depending on the selected finish
- The chair fits perfectly into the HAY universe and is easy to pair with other HAY furniture
- Suitable for a wide variety of private and public environments

X-LINE CHAIR DESIGN BY NIELS JØRGEN HAUGESEN

Originally designed by Niels Jørgen Haugesen in the late '70s, the X-Line Chair has joined HAY's universe of timeless, original designs. Made in thin metal wire, the chair's industrial expression and high-precision steel construction make it a fine example of the 1970s high-tech movement. The carefully thought-out design offers optimal functionality, with the refined design process resulting in the distinctive X-structure, adding flexibility and strength to the chair, as well as visual appeal. Available in carefully selected colours and finishes, X-Line's simple and logical design language remain just as relevant today. Its minimalist expression combined with its durable and stackable qualities make it a versatile seating solution for a wide assortment of private or corporate contexts in both indoor and outdoor settings.

Niels Jørgen Haugesen (1936–2013) was a Danish designer known for his minimalistic designs with clean lines and structural clarity. After studying at the Danish School of Arts, Crafts, and Design, he worked with Arne Jacobsen, whose craftsmanship greatly influenced him.
