- Solid oak

SSD FULL WOOD CHAIR - 2022

This is the latest addition to the iconic SSD range.

After launching the wood and steel version, the recycled plastic version, the textile version and finally a bar version, this was the missing piece in this collection, and the first all-wooden object at TIPTOE.

The structure and assembly have been completely rethought. It is made of solid wood and FSC certified moulded plywood. We took care to keep the ergonomics and proportions of its big sister. As always it is delivered flat packed, to reduce its environmental impact with a simple and intuitive assembly experience.

CERTIFICATS

The wood for this product comes
from sustainably managed
forests and controlled sources.
